Sponsored Obstacle Course

Next week we will be making obstacle courses for the children to run, jump and balance along. The children will be doing the course within their group times, and we will choose the days according to the weather. As always, please ensure your children's footwear is suitable for outdoor play.

Sponsorship forms have been put into the bags today. We are hoping to raise enough funds to buy some new blocks for our block area. Please send any sponsorship money that has been collected by Friday 5th July.

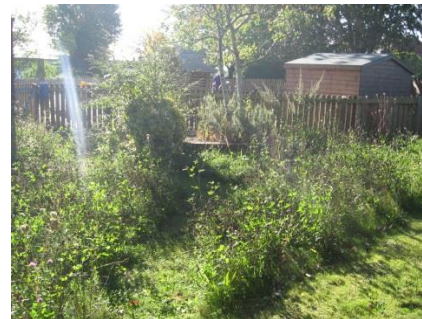

Visits to Langley Moor Primary

If your child's visit to Langley Moor Primary is within their usual session at nursery, our staff will take them over to school. We will assume that **you** will be collecting at 2:30pm from the yard of the primary school (at the coloured fence) unless you tell us otherwise.

For the final visit on Thursday 27th June, we can take the children over and bring back those who stay all day. If your child normally just attends for a half day, we will assume that you are collecting them.

Extra books

Each Wednesday N2 will now bring two library books home. The second book contains a very simple text. Please encourage your child to show you the letters that they know; remember it is the sounds that they learn first. Some children may even be able to build up some of the words.

Diary Dates

Last day of term

Zoolab visiting after school club

On **Wednesday 19th June** the nursery is being visited by Zoolab, who are bringing a variety of creatures for the children to see. The session will take place after school, and finish at **4.15pm**. The charge for this is **£6** (including the afterschool care), which should be paid either through Parent Pay or by cash. There is limited availability for this event, so places will be given on a first come first served basis
